QuantStudio 3 and QuantStudio 5 Real-Time PCR Systems

Connect to your data anytime, anywhere

ThermoFisher
SCIENTIFIC

Connect with your future

The modern laboratory is undergoing a technological revolution. Today's scientific breakthroughs emerge in a context of unparalleled connectivity. Lab instruments not only are more compact, automated, powerful, and accessible, but also can store and can connect to platforms that can share vast amounts of data, facilitating scientific advances through global collaboration.

As your trusted partner at the leading edge of this era of innovation, we've

developed the Applied Biosystems™ QuantStudio™ 3 and 5 Real-Time PCR Systems. These high-performance benchtop instruments allow you to remotely monitor your runs, as well as easily access and securely share results with colleagues anywhere, anytime when connected to Thermo Fisher Cloud. With your data always within reach and shareable, the answers shaping the future of science are never far away.

QuantStudio 3

applied biosystems
by Thermo Fisher Scientific

Interactivity

- Interactive touch screen
- Run and edit directly from touch screen
- Easy and intuitive interface

Accessibility*

- Access experiment runs from any location, anytime, with remote monitoring
- Wi-Fi-enabled connectivity
- Utilize portable devices to quickly analyze data when you need to

*With Internet access and Thermo Fisher Connect

Collaboration*

- Quickly share data sets and protocols online
- Send large files securely around campus or around the world
- Integrate and analyze multiple data sets and data types into one project

Discover the QuantStudio 3 and 5 Real-Time PCR Systems

The QuantStudio 3 and 5 Real-Time PCR Systems are the latest additions to our family of QuantStudio systems.

These instruments provide our latest advancements in touch-screen usability, allowing you to stay connected to your data easily. They're designed for both new and experienced users who need simple and affordable real-time PCR systems without compromising performance or quality.

Access, analyze, and share data anytime, anywhere—

Remotely monitor your runs, analyze sophisticated data sets in minutes, store data in a secure space, and share results online with colleagues across institutions and around the world, with Web browser-based software. Monitor your runs in real time from mobile devices through the Instrument Connect mobile app.

Obtain results you can trust—Detect differences in target quantity as small as 1.5-fold in singleplex reactions, and obtain 10 logs of linear dynamic range.

Establish standard operating procedures and

compliance with ease—Locked protocol templates, in-run quality control (QC) feedback, and QC traceability of consumables offer greater control of experimental data. Real-time data mark-up language (RDML) export is available for compatibility with MIQE guidelines.

Helps save valuable time—3 or 6 independent temperature zones for flexibility to run multiple experiments simultaneously. Fast thermal cycling is also available, enabling results in less than 30 minutes.

Get started quickly—Instrument is factory-calibrated for optical and thermal accuracy, quick installation, and immediate use.

Skip the learning curve—With preoptimized protocol templates, training is minimized for new users, allowing you to focus on your research.

Maximize benchtop space—Compact instrument can be configured as a stand-alone unit or with a computer to fit most laboratory needs.

Get a premium instrument at an affordable price—Innovation doesn't have to come at a premium price. Get the state-of-the-art Applied Biosystems functionality and industrial design that you've come to know, with the QuantStudio family of instruments.

Interactivity

Simple, intuitive software—at your fingertips

- Interactive touch-screen interface and simplified Applied Biosystems™ QuantStudio™ Design and Analysis Software make it easy to get started and stay organized
- Easily identifiable icons guide you through the workflow to set up runs and analyze experiments
- Graphical interface allows easy editing of experimental conditions (Figure 1A)
- Interactive touch screen allows you to manipulate view to a particular graph or data point (Figure 1B)
- Option to pause a real-time PCR run on demand
- Preoptimized protocol templates allow quick selection of default protocols for standard applications
- Locked workflow feature allows for experimental consistency in tightly controlled environments

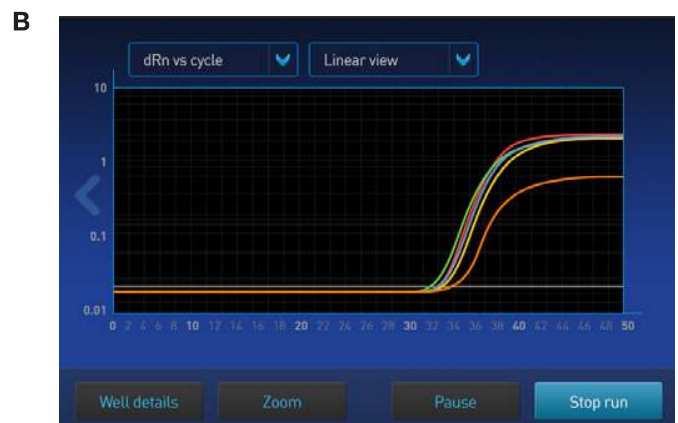

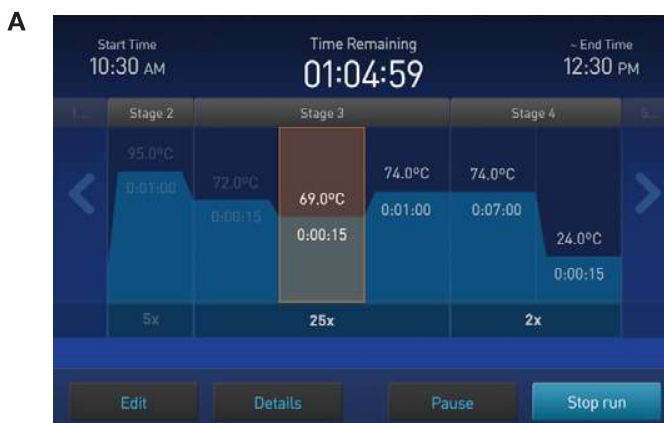

Figure 1. Graphical interface allows (A) easy editing of thermal cycling conditions and viewing of plate layout, as well as (B) viewing of amplification plots and drilling down to a subset of sample wells.

Accessibility

Two ways to access QuantStudio Design and Analysis Software

Access with Web browser-based software

Co-locate with computer

Web-based or online:

- Web browser-based system configuration with PC or Mac™ computers
- Streamlined software for improved usability and analysis response time
- Enables secure access of your data when and where you want it
- No software to install, no additional fees, and no versions to update
- Monitor and check instrument status
- Real-time run monitoring with Instrument Connect mobile app

Desktop:

- Simple co-located computer system configuration
- Streamlined software for improved usability and analysis response time

For more information about the Thermo Fisher Connect platform and data security, go to

Collaboration

Fast and powerful secondary analysis software to extract and share results

Applied Biosystems™ Analysis Modules are innovative cloud-based data analysis applications that bring together multiple data sets in one convenient place, and render them in stunning data visualizations for enhanced analysis and insights.

Anywhere, anytime access

Access your data with a compatible browser on any device. Each registered user has a PIN-protected account on Thermo Fisher Connect.

Fast and powerful analysis

Analysis speeds up to 10 times faster than our desktop software version, to help analyze more data and gain insights more quickly than before using Thermo Fisher Connect.

Easy to use

One-click quality checks and comparisons between different visualizations, for simple and convenient data analysis.

Integrated analysis solution

Integrate your experiments into a single project—analyze various groups of data, such as time course experiments or cell line comparisons, and pick ideal settings to easily compare data.

Superior security

Powered by Amazon Web Services™, the Thermo Fisher Connect platform helps protect your data in a highly secure environment using 256-bit encryption and physical security measures.

MIQE guideline support

The instrument software allows users to save predefined analysis settings for auto-exporting run data into their format of choice, including RDML (real-time data mark-up language, compliant with MIQE guidelines) export format.

The Applied Biosystems Analysis Modules include:

Absolute quantification

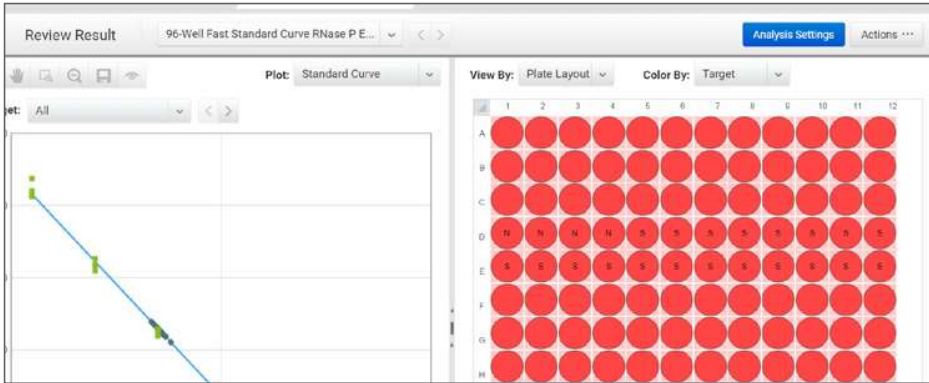

Figure 2. Absolute quantification module for gene expression analysis. The module enables analysis of genes of interest with the use of a standard curve. Additional flexibility is achieved by importing standard curves from other experiments.

Relative quantification

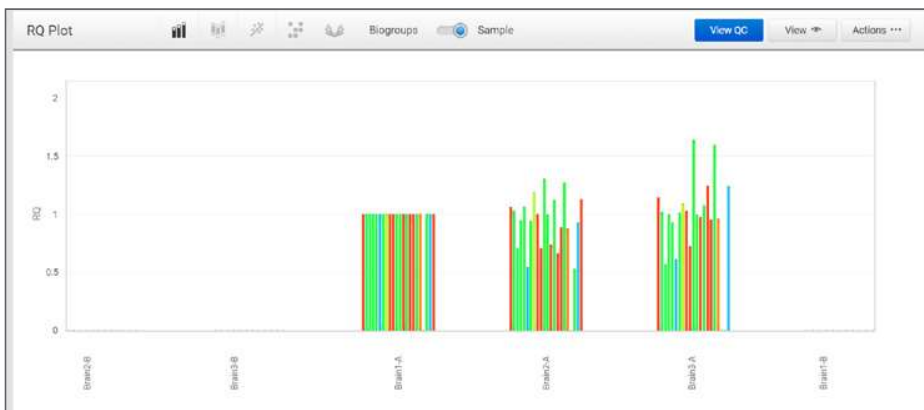

Figure 3. Relative quantification module for gene expression analysis. With this module, you can customize groupings of data within projects for a thorough comparison of data. The module also includes integrated correlation, volcano, and cluster plot analysis, with the ability to drill down to amplification plots.

Genotyping

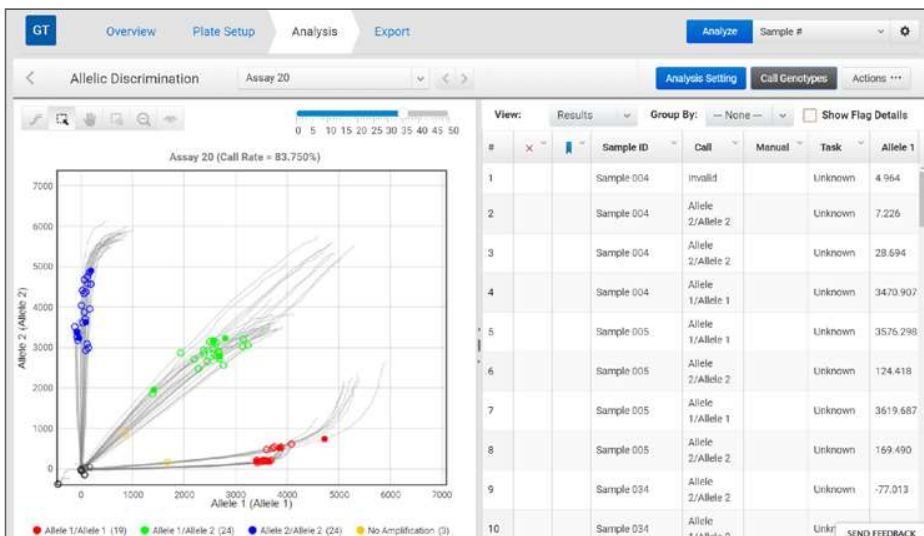

Figure 4. Genotyping analysis module. This module expands on existing Applied Biosystems™ TaqMan® Genotyper™ software with improved visuals and integrated traces of allelic discrimination plots. The module allows for thorough quality control of SNP assays to accurately reflect true signals vs. background noise.

Generate high-quality data for a variety of applications

Performance you can trust

Utilizing proven Applied Biosystems™ OptiFlex™ technology and VeriFlex™ Blocks, QuantStudio 3 and 5 systems offer improved data accuracy and sensitivity for a broad range of genomic applications, such as analyses of gene expression, microRNAs and noncoding RNAs, SNP genotyping, copy number variation, mutation detection, drug metabolism enzymes, and protein expression.

Precise quantification with 1.5-fold discrimination

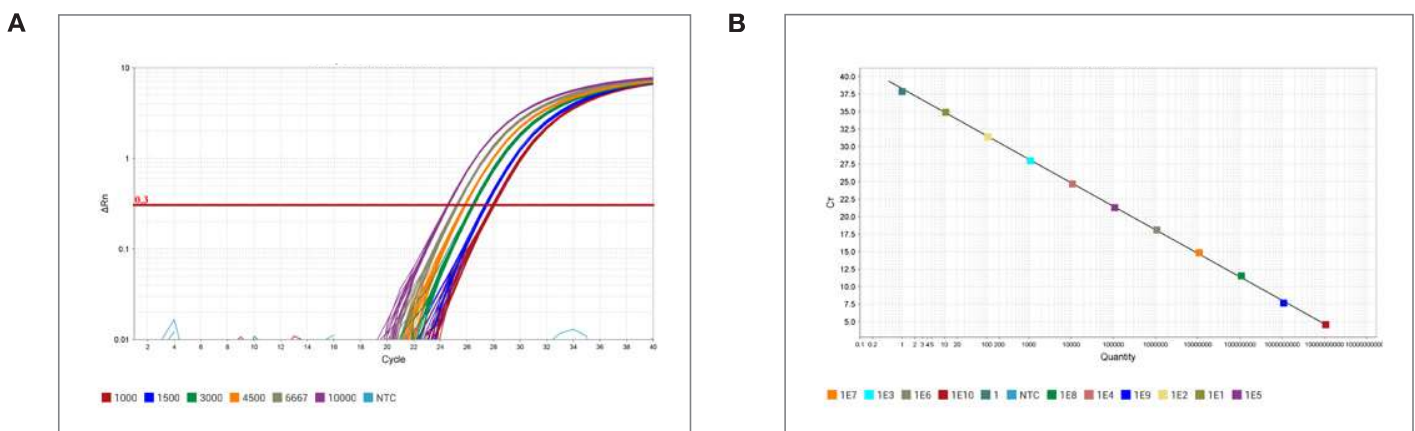

Figure 5. The QuantStudio 3 and 5 systems provide sensitive detection and high-confidence target discrimination down to 1.5-fold differences. (A) Amplification plots for 1.5-fold dilutions of a KAZ plasmid amplified with Applied Biosystems™ PE2 TaqMan® Assay under Fast run conditions using TaqMan® Fast Advanced Master Mix. Quantities assayed, and C_t (SD): 1,000 copies, 27.9 (0.063); 1,500 copies, 27.4 (0.059); 3,000 copies, 26.4 (0.060); 4,500 copies, 25.8 (0.047); 6,667 copies, 25.2 (0.049); 10,000 copies, 24.5 (0.041). NTC = no-template control. (B) Standard curve generated from the C_t values.

Excellent reproducibility and 10-log dynamic range

Figure 6. Real-time PCR reproducibility. This plot shows results from amplification of KAZ target plasmid DNA in 10-fold dilutions using the 96-well block. The data show highly reproducible results over 10 logs of input template amount, illustrating the broad linear dynamic range of the system.

Generate high-quality data for a variety of applications

Assay flexibility to support your application

The QuantStudio 3 and 5 systems support probe-based assays as well as intercalating dyes. TaqMan® probe-based assays, developed with powerful algorithms and optimized master mixes, enable outstanding specificity and sensitivity. Applied Biosystems™ SYBR™ Green chemistry is an economical alternative for target identification or initial screening assays. The QuantStudio 3 system has 4 filters calibrated for FAM™/SYBR Green, VIC™/JOE™, NED™/

TAMRA™, and ROX™ dyes. The QuantStudio 5 System offers 96-well and 384-well format options, allowing for a broader range of detection chemistries and assay multiplexing. The 96-well format has 6 excitation filters (450–680 nm) and 6 emission filters (500–730 nm), and the 384-well format has 5 excitation filters (450–650 nm) and 5 emission filters (500–700 nm).

Melt curve analysis

Figure 7. Melt curve analysis using the online version of the software. In this experiment, 96 replicates of human genomic DNA were amplified using Applied Biosystems™ SYBR™ Select Master Mix with primers for RNase P followed by a dissociation step. The reactions were run under Fast run conditions, showing C_t uniformity with a mean of 25.7 (SD 0.077), and thermal uniformity as measured by the derivative peak with a melting temperature (T_m) of 84.17°C (SD 0.07°C).

Multiplex gene expression

Genotyping analysis

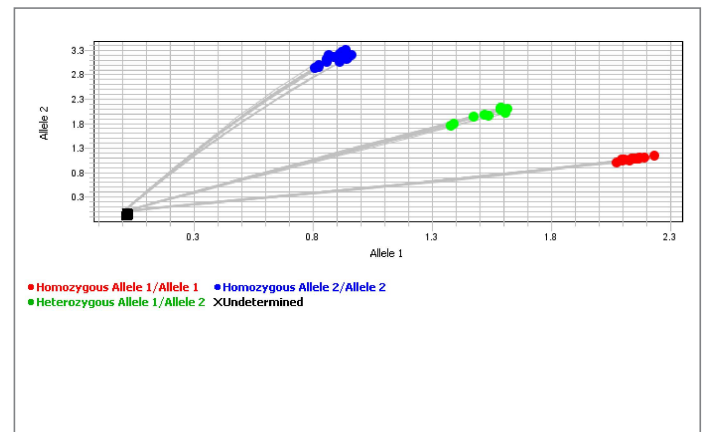

Figure 9. Allelic discrimination plot with traces using real-time PCR data. Cluster plot of 44 gDNA samples and 4 no-template controls (NTCs) genotyped using Applied Biosystems™ TaqMan® SNP Genotyping Assay C_29086771_20, with both PCR and allelic discrimination performed on the QuantStudio 5 Real-Time PCR System. The novel use of real-time PCR data to plot SNP cluster progress aids in calling ambiguous samples and reduces run times by displaying the optimal number of cycles necessary for maximum cluster separation.

Figure 8. Multiplex reaction with 4 targets plus passive reference.

Whole-plate amplification plots of 96 replicates of cDNA made from universal human RNA (UHR) amplified under Fast run conditions using Applied Biosystems™ TaqMan® Multiplex Master Mix with Mustang Purple™ passive reference dye. Targets and labels: FZD1 labeled with FAM dye, APOE labeled with VIC dye, CD44 labeled with ABY™ dye, GAPDH labeled with JUN™ dye.

Sensitivity	Detect differences as small as 1.5-fold in target quantities in singleplex reactions	Detect differences as small as 1.5-fold in target quantities in singleplex reactions

Service and support to help meet your changing needs

SmartStart orientation

Every QuantStudio 3 and QuantStudio 5 system includes a SmartStart orientation to get you up and running quickly in your lab. The orientation includes basic qPCR familiarization and setup with both Thermo Fisher Connect and online Instrument Management. QuantStudio 5 system owners receive a personalized qPCR application training.

Online instrument management

Sign in to your account to access the award-winning free online Instrument Management tool that enables faster responses to requests for service or service quotes, plus fast connection to key instrument and service information.

Comprehensive instrument warranty

Our factory-trained and certified field service engineers (FSEs) are focused on delivering the highest-quality workmanship. During the warranty period, all qualifying repairs, including engineer time and travel, are covered.

Flexible service plans

Choose from a variety of service options that balance your budget, productivity, uptime, and regulatory requirements. Plans start with the most basic repair models and scale to premium offerings including advanced support and compliance services. On-site service plans are optimal for labs that have time-sensitive work and need to get their instrument back online quickly. These plans include guaranteed response times in most regions, scheduled planned maintenance, and automatic software updates. The AB Repair Center plan is a cost-effective choice for customers who can allow their instrument to be sent away for repair—this plan provides a loaner instrument so that customers can maintain productivity while their instrument is being repaired.

Professional services

Our services are designed to help you balance business and regulatory requirements—from risk assessment, hardware/software qualification, full system validation, and LIMS interfacing services to data storage and backup solutions. We partner with you to help mitigate regulatory risks, get your processes up and running, and help ensure data integrity across your lab.

Training courses

Our application and instrument training programs are led by scientists who aim to enhance your workday through experimental design best practices, workflow training, and instrument troubleshooting. Hands-on classes are available at our Thermo Fisher Scientific training centers or in your lab.

Technical support

If you have questions about product selection or use, assay or experimental design, data analysis, or troubleshooting, contact our team of technical support scientists or access our online product and application support tools.

Financing options

If you're looking for accelerated return on investment, technology protection, or cash flow management, our innovative financing options can help meet your company's budgetary needs and bottom-line goals. Contact your local sales representative for more details.

For a full schedule of courses, including self-paced online classes, go to thermofisher.com/training

* 2012 Oracle™ Fusion Middleware Innovation Award.

** Online Instrument Management tool not available in all regions.
